

Group 4 - IITM AI Powered Product Design and Management - Uniserv

Capstone Submission • Master Index of Deliverables & Live Demo Access

► **What is UniServe?** A multi-tenant, AI-powered citizen complaint & feedback portal. Citizens write in over Email or WhatsApp; an AI pipeline verifies identity, gathers missing details, classifies and prioritises the complaint, de-duplicates it against open tickets, and routes it into a role-based agent dashboard with a structured resolution workflow and full audit trail.

⚠ FIRST-TIME USE — PLEASE READ BEFORE TESTING ⚠

The back-end services are hosted on Render's free tier and **go to sleep when idle**. Wake them up first:

1. Log in to the dashboard as **admin**.
2. Open the **System** tab.
3. Hit **Refresh** a couple of times — this spins every service back up.

→ **ONLY AFTER THIS** should you send the complaint email or WhatsApp message and try the end-to-end flows. Skipping this step will make the first requests time out.

🚀 LIVE APPLICATION

🌐 **Dashboard URL** <https://uniserv-delta.vercel.app>

💡 **Navigation tip** The app opens on the “Agent Sign in” screen. To reach the **citizen portal**, click the small link at the bottom of that sign-in screen.

✉ HOW TO REACH THE SERVICE — CITIZEN CHANNELS

✉ **Complaint e-mail** uniservportal@gmail.com — send your complaint here as a normal e-mail.

💬 **WhatsApp number** **+91 44-79614691** — message this number on WhatsApp to raise / follow up a complaint.

🔑 CREDENTIALS — USER IDs & PASSWORDS

👤 **Where to find them** All demo logs are listed in the repository README → github.com/sasashok19/uniserv/blob/main/README.md

📄 SOURCE CODE

📁 **GitHub repository** <https://github.com/sasashok19/uniserv/> — full monorepo: services, dashboard, tests & docs.

📁 GOOGLE DRIVE — SUBMISSION ARTIFACTS

📁 **Main submission folder** Top-level folder containing everything below. [Open main folder ↗](#)

📄 **/docs** ALL prompts used for application development. [Open folder ↗](#)

📄 **/.claude/agents +
/.claude/commands** Every agent & command file used by Claude Code to generate the Integrated Market Strategy and the Digital Marketing Strategy. [Open folder ↗](#)

📄 **/artifacts** Key non-code artifacts — the presentation, the video presentation, Integrated Market Strategy, Digital Marketing Strategy and UniServe_Evolution. [Open folder ↗](#)
